(54) Title: PORTABLE DENTAL CARE STAND

(57) Abstract: The present invention provides a portable dental care stand. The portable dental care stand includes: a cover part having a handle formed at an upper portion; a machine part connected with the cover part by using a separable hinge, and the machine part having: an upper plate covering an upper portion of a rectangular housing, which is opened at the upper portion and a lower portion, a rectangular machine chamber having an opened upper portion and disposed at a predetermined removed portion of the upper plate, an operation panel having a predetermined slanting surface and installed at the opened upper portion of the machine chamber, the operation panel having a plurality of operation buttons at the slanting surface, and a mount installed using a sliding member at a lower end of the machine chamber; a rectangular box part having an opened upper portion and connected with the machine part by using a spreadable or foldable leg part; and hooks installed at a front and rear of the machine part and the box part to couple the machine part with the box part.
